Media Thickness up to 0.6" thick  
Color and Monochrome Models  
Scanning Speeds up to 14" per sec.  
USB and Ethernet Interface

**MULTI-FUNCTION  
SCANNING AND COPYING**

## Select Scanner Model

Purpose of the Scanner	Create an archive, or import into CAD / Graphic Art program	A stand-alone scanner will accommodate this need
	Copy large documents to send to a Wide Format Printer	MFP Multi-Function Systems, available in side-by-side or space saving, single footprint configurations
Type of Documents to be scanned	Size of largest document (width)	Scanners are available in 24", 36", 42" 44" or 54" scan widths
	Black and White (Monochrome) or Color	i3610s and i4210s are black and white scanners, upgradeable to color. All other models support color scanning
	Technical Drawings and Plans or CAD Plots	IQ Quattro and SD Series are excellent for technical drawings. The HD Ultra Series accommodates thick media.
	Maps and other GIS Data (Non Photographic)	IQ Quattro, SD, and HD Ultra Series models capture the finest details for these document types
Condition of the Documents	Graphics, Photos, Artwork and other Color Prints	The HD Ultra Series and its use of CCD Technology is best suited for this application
	Good Quality Paper, Mylar, Vellum, etc.	IQ Quattro and SD Series offer quality scans at high speeds and low cost. HD Ultra handles thick originals
	Originals are folded, wrinkled, or torn and taped	All models are designed to handle these document types
Volume Requirements	Thick mounted originals on Display Board or Foam Board	HD and HD Ultra Series have Automatic Thickness Adjustment up to 0.6"
	Project-Based (on demand needs)	For those occasional projects requiring less volume, models offering slower speed will do the job for less cost
	Productivity-Based (scanning projects)	IQ Quattro Series offer color scanning speeds up to 14" / sec. HD Ultra Series offer the highest image quality.

## Select Scanner Software

Scanning and Printing	Scan, enhance and save your originals	Nextimage <sup>4</sup> SCAN+ARCHIVE links your scanner, digital storage, existing applications, and your printers
	Scan, enhance, save, copy and network printing	Nextimage <sup>4</sup> REPRO adds multi-function capabilities plus touch-screen compatibility and Network printer support

## Select Scanner Stand

Regular	Adjustable Height with Document Basket (32.8"- 34.8")	Allows for mounting of plotter/printer beside scanner - Available for iQ, SD and HD models.
High	Adjustable Height with Document Basket (30.2"- 43.9")	Allows for mounting of plotter/printer under scanner - Available for iQ, SD, HD, and MFP models.

## Select Scanner Warranty and Services

Included	Parts Warranty	Included with all models. 24 Month Parts Warranty with fast and easy parts replacement
On-Site	On-Site Parts and Labor	Available for all models. Options for 24, 36, 48 and 60 months coverage
Installation	On-Site Installation and Training	Available for all models. Includes unpacking, installation, activation, calibration, and testing at your location

All Scanners support 256 Greyscale | Scanning Speed shown in inches/second | Scan Width and Media Thickness shown in inches | Max Resolution shown dpi | Specifications and Pricing Subject to Change without Notice  
HD ULTRA models i3610s and i4210s are monochrome scanners that are upgradeable to color | iFLEX scanner not offered with support stand

**SCANSTATION**

- ScanStation combines a scanner with;
- a high or low adjustable stand with mounts for PC and touch screen
  - Nextimage<sup>4</sup> REPRO Software
- Just add your computer and printer and you have a "walk-up" copier.

**MFP REPRO  
SYSTEM**

- MFP REPRO combines a scanner with;
- a high or low adjustable stand with mounts for PC and touch screen
  - touch screen monitor
  - Nextimage<sup>4</sup> REPRO software
- Just add a printer and you have a large format copier.

**MFP2GO  
SYSTEM**

- MFP2GO combines a scanner with;
- a high or low adjustable stand with mounts for PC Controller
  - PC Controller Panel embedded with Nextimage<sup>4</sup> REPRO software
- Just add a printer - No PC required.

**NEXTIMAGE<sup>4</sup>  
SCANNER  
SOFTWARE**

With Nextimage<sup>4</sup> SCAN+ARCHIVE software, you can scan, enhance and save originals in a single flow, linking your scanner, digital storage, existing applications, and your printers. Nextimage<sup>4</sup> REPRO version adds support for touchscreens and network printers. Nextimage<sup>4</sup> REPRO is included with ScanStation, MFP REPRO systems and MFP2GO Systems.

**SCANNER  
SUPPORT  
STANDS**

Choose a high or low adjustable stand for any large format model. High adjustable stand allows printer to fit below scanner. All ScanStation and MFP REPRO system stands include mounting brackets to attach a computer, a keyboard and a touch screen monitor. MFP2GO stands include a bracket to attach the included touch screen controller.
